

The image shows a screenshot of the Microsoft Visual Studio Debug Console window. The window has a title bar with the text "Microsoft Visual Studio Debug Console" and standard minimize, maximize, and close buttons. The console area is black with white text. The output shows a program that prompts for a string, reverses it, and prompts for a number, converting it to decimal and binary. The program then displays the file path and process ID, and finally prompts the user to press any key to close the window.

```
Enter a string => McGhee
You entered McGhee
Reverse is eehGcM

Enter a number: 17
Decimal: 17
Binary: 10001

C:\Users\J.McGhee\source\repos\BaseProject\Debug\BaseProject.exe (process 7524)
exited with code 0.
Press any key to close this window . . .
```
